ABOUT ME

With over 2 years of experience in the industry, I'm a seasoned full-stack programmer with a strong focus on front-end development. I've developed a strong passion for IT, and it's the result of the dedication and countless hours I've invested that I've genuinely delved into functional programming, and object-oriented programming principles during my work. Plus, I'm known for my easygoing nature, making it a breeze to collaborate and communicate effectively with colleagues. I'm also always up for embracing new technologies and tools to stay in sync with the fast-paced world of IT.

WORK EXPERIENCE

31/12/2022 – CURRENT Johannesburg, South Africa
WEB DEVELOPER LIBEX MARKETPLACE

-Decentralized Finance Application
During this project, I actively contributed to the development of a DeFi application using technologies such as React and TypeScript. Additionally, I integrated blockchain technology to ensure secure and transparent transactions.

-Internal Management System
My contribution to the development of an internal management system for the company using React Native and TypeScript enabled efficient resource tracking and optimization of internal processes. This project was crucial in improving our internal operations.

-NFT Marketplace
By creating an NFT Marketplace using technologies like NextJS and Node.js, I facilitated the sale of virtual assets while simultaneously integrating blockchain technology for added security. This project was essential for expanding our presence in the world of NFTs.

07/02/2023 – 04/08/2023 Novi Pazar, Serbia
TEACHER CENTAR NIT

As a lecturer at an IT start-up center, my job focuses on teaching HTML, CSS, JavaScript, and React. This position requires creativity, patience, and the ability to successfully convey programming concepts to students. Additionally, as a lecturer, I have the opportunity to participate in the development of new courses and modules that will help students gain a competitive advantage in the field of web design and development. My passion for technology and teaching helps me connect with students and motivate them to achieve their goals.

03/01/2022 – 18/12/2022 Novi Pazar, Serbia
FULL-STACK DEVELOPER CENTAR NIT

After completing a React course, I worked on a software project for a Clinic. I focused on the front-end, but also worked on the back-end. The project aimed to manage patient data and medical records, and I collaborated with other developers and stakeholders to deliver it. The experience taught me valuable skills in Agile development and working on a real-world project.
